

VIZIANELLO VZ 18

1x SG 40

INSTALLING THE NEW SG40 ON A VIZIANELLO VZ 18

Dec 8, 2025

A recent refit carried out by [SV Servizi](#), Smartgyro's certified dealer in Italy, showcases the practical advantages of Smartgyro modularity. The owner of the Vizianello VZ18 selected the [latest-generation SG40](#) after evaluating several stabilization solutions on the market.

The model stood out for its optimized performance, reduced power consumption, and the unique capability to perform complete onboard maintenance thanks to Smartgyro's serviceable vacuum sphere; a key differentiator compared to other gyro systems.

The installation environment presented a common challenge: very restricted access to the crew cabin, where the stabilizer needed to be positioned. This is where **Smartgyro's modular design proved essential**. The [SG40](#) was brought onboard in separate modules, dramatically simplifying the process and avoiding invasive structural work. The only modification required was a small opening in a bulkhead to allow the sphere — the system's largest component — to pass through. Once inside, the unit was quickly assembled and secured.

For the owner, this resulted in a clean, efficient installation and long-term confidence in a stabilizer that can be serviced anywhere, without removal from the vessel. For SV Servizi, it was a clear demonstration of how Smartgyro's engineering philosophy can simplify even the most challenging refits.
